

BITE Department Course Information

Year 9 - ICT Programme of Study 2010-2011 BTEC First Certificate ICT

Students are to undertake a 2 unit course of study in Customising Software and Communicating in the ICT Industry. Upon successful completion of the two units, students will gain a Level 2, GCSE equivalent award between C and A* depending upon their level of achievement.

Whilst the course is delivered in the ICT suites, many of the e-tutorials that students use to help in completing the assignment tasks are available to students via the Tong High School Website. It is hoped that students will make full use of these resources to improve their individual learning and assist in the event of sickness or absence from school. As this is a new qualification, students will be able to take this work further into year 10 and gain up to a 4 GCSE equivalent ICT qualification.

The course is assessed as follows:

PASS = C

MERIT = B

DISTINCTION = A

DISTINCTION* = A*
